| 14:05 – 14:25 | **Megatrends in PropTech**  
Presentation on key trends that are the most exciting in the realm of proptech today, and which of those are being implemented by real estate owners and developers. Is the promise of tech and innovation in real estate creating a significant change in the way we build, manage and invest in real estate? |
| 14:25 – 15:10 | **The Big Players Panel**  
– what are the most established tech players working on in relation to the built environment? Is cutting edge tech for real estate being implemented at scale by those players, and how is this tech being developed – in house or via M&A? And how those established companies are incorporating tech solutions for decarbonisation and sustainability in particular, as those are at the forefront of real estate owners' list of challenges? |
| 15:10 – 15:25 | Break                                                                      |
| 15:25 – 15:45 | **Presentation of Winners of ULI APAC x Taronga Tech for Resilience Ideas Competition** |
| 15:45 – 16:30 | **Smart Cities, Smart Buildings, Smart Climate?**  
Sustainability, decarbonisation, efficient resources utilisation and climate change are all challenges that the real estate industry can no longer ignore. Moreover, the drive to sustainable future is a non-negotiable part of strategy for those companies going forward. What are the most exciting solutions in this space, and how are real estate owners implementing those? |
